

Directional valve 2-way/2-position

$Q_{\max} = 140 \text{ l/min}$, $p_{\max} = 350 \text{ bar}$

switching solenoid, bidirectional, pilot operated, poppet type

Type series: WSVN22G-10F...

- Screw-in cartridge valve
- For cavity HF/C1220A
- All external parts with zinc-nickel plating according to DIN EN ISO 19598
- Fits common cavity according to ISO
- Reliable switching, even after long dwell times
- De-energized closed
- The slip-on coil can be rotated, and it can be replaced without opening the hydraulic envelope
- High pressure wet-armature solenoids
- Various plug-connector systems and voltages are available

Description

The 2-way/2-position solenoid-operated directional seat valves, series WSVN22G..., are size 10 / SAE 12, two stage, pressure balanced screw-in valves with an 1 1/16-12 UN mounting thread. The main and pilot stages are both designed on the poppet/seat principle, and they are therefore virtually leak-free in both directions of flow (bidirectional seat-valve shut-off). All external parts of the screw-in valves are zinc-nickel plated and are thus suitable for use in the hars-

hest operating environments. The slip-on coils can be replaced without opening the hydraulic envelope and can be positioned at any angle through 360°. These valves are used in mobile and industrial applications where leak-tight shut-off functions are crucially important. Examples are where loads, tensions, or clamping forces must be held without leakage. For self-assembly, please refer to the section related data sheets.

Symbol

Technical data

General characteristics	Description, value, unit
Sales category	minimum order quantity required (see order details)
Function group	Directional valve
Function	2-way/2-position
Design	Screw-in cartridge valve
Controls	switching solenoid
Characteristic	Characteristic
bidirectional	pilot operated, poppet type
MTTFd value	150 years
Construction size	NG 10 / SAE 12
Thread size	1 1/16-12 UN-2A
Mounting attitude	unrestricted
Weight	0,6 kg
Cavity acc. ISO	fits into ISO 17209: 1 1/16-01-0-13
Cavity acc. factory standard	For cavity HF/C1220A
Tightening torque steel	150 Nm
Tightening torque aluminium	150 Nm
Tightening torque tolerance	± 10 %
Minimum ambient temperature	- 30 °C
Maximum ambient temperature	+ 50 °C
Surface protection	All external parts with zinc-nickel plating according to DIN EN ISO 19598
Sealing material	see ordering code
Seal kit order number	NBR: DS-518-N / FKM: DS-518-V

Hydraulic characteristics	Description, value, unit
Maximum operating pressure	350 bar
Maximum flow rate	140 l/min
Flow direction	see symbol
Hydraulic fluid	HL and HLP mineral oil according to DIN 51 524; other fluids on request!
Minimum fluid temperature	- 30 °C
Maximum fluid temperature	+ 80 °C
Viscosity range	10 ... 500 mm ² /s (cSt)
Recommended viscosity range	15 ... 250 mm ² /s (cSt)
Minimum fluid cleanliness (cleanliness class according to ISO 4406:1999)	class 20/18/15

Electric characteristics	Description, value, unit
Actuator type	solenoid coil
Solenoid coils type	D36
Supply voltage DC	12/24 V DC
Supply voltage AC	115/230 (50 ... 60 Hz) V AC
Supply voltage tolerance	± 10 %
Nominal power consumption	V DC = 27 W / V AC = 25 W
Switching time	Switching time measured at: U_N ; $\Delta p = 280$ bar; $Q = 112$ l/min; $T_{Ambient} = 20$ °C; $\vartheta = 46$ mm ² /s 1 to 2: 78 ms (energizing) 63 ms (de-energizing) 2 to 1: 79 ms (energizing) 73 ms (de-energizing)
Relative duty cycle	100 %
Electrical connection coil	several connection types available, see ordering code
Protection class solenoid coil to ISO 20 653 / EN 60 529	several classes of protection available, see ordering code (with appropriate mating connector and proper fitting and sealing)

NOTE!

The switching time can be strongly dependent on flow rate, pressure, oil viscosity and the dwell time under pressure. In practice, the switching time may therefore deviate from the specified value range.

Performance graphs

measured with oil viscosity 33.0 mm²/s (cSt), coil at steady-state temperature and 10 % undervoltage

$p = f(Q)$ Performance limit

$\Delta p = f(Q)$ Pressure drop-flow rate characteristic

1) = 2→1
2) = 1→2

Dimensions and sectional view

Installation information

i IMPORTANT!
1) When fitting the screw-in cartridge valve, use the specified tightening torque. The value can be found in the chapter "Technical data".

! ATTENTION!
Only qualified personnel with mechanical skills may carry out any maintenance work. Generally, the only work that should ever be undertaken is to check, and possibly replace, the seals. When changing seals, oil or grease the new seals thoroughly before fitting them.

i NOTE!
The seals are not available individually. The seal kit order number can be found in the chapter "Technical data".
